Hey Anibal,

The most newbie-friendly way to add a library to a project is to:

1. Search for the library
2. Look for the source file
3. Copy the source file
4. Paste what you copied into the project.

This works, but it's a painful process. It's easier if you use CDNs like JSDelivr.

<https://zellwk.com/blog/jsdelivr>

Enjoy!

Stay awesome,  
Zell
